Latex Cautions

Philips Medical Supplies currently distributes over 600 products, of which less than 9% contain natural rubber latex or dry natural rubber that could contact humans. Because these substances may cause allergic reactions, products in this guide that contain them are identified with the following symbol:

LATEX

Caution: Products that are identified with this symbol contain dry natural rubber or natural rubber latex that can come into contact with humans and may cause allergic reactions.

To the best of our knowledge, products not identified with this symbol are not known to contain natural rubber latex or dry natural rubber.The latex symbol indicates **only** which **medical supplies** contain natural rubber latex or dry natural rubber that can come into contact with humans and may cause allergic reactions. If you want to know whether a Philips **medical device** contains natural rubber latex or dry natural rubber, refer to the product labeling.

The FDA requires that products be labeled with human contacting latex content information when appropriate. Always refer to product labeling for accurate information on human contacting dry natural rubber or natural rubber latex.

CE Marking

Products labeled with this symbol conform to the European Union (EU) directives as mandated by EU member state legislation and are available for sale in Europe to countries that accept CE marking with restrictions as may be noted. Medical devices labeled with this marking means the product is in conformity with the European Medical Directive (MDD): 93/42/EEC Council Directive of 14 June 1993 on the approximation of the laws of the Member States concerning medical devices.

In order for a product to be able to be labeled with the CE marking, product quality and manufacturing quality systems must be documented to comply with certain standards. Compliance with the European directives and regulations ensures a standard level of performance for device function, safety, and health protection for users, patients, and others.

The CE symbol provided with some products in the Philips Medical Supplies Reference Guide and online store is intended only as an indication of availability in EU countries and is not intended as a legal product marking.

Countries that accept CE marked products include Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. A CE mark does not necessarily indicate that a product is marketed or distributed in all of the countries listed above.

Non-medical products that comply with other harmonized directives may also bear the CE mark.

Each Philips medical product that is labeled with the CE marking is identified with one of the following symbols:

CE

CE 0366

CE 0123

Other manufacturers' CE marking symbols may include but not limited to:

CE 0366

Ordering Information

To order the medical supplies in this guide or to obtain more information or additional literature, contact your Philips Medical Supplies representative near you or visit our website: http://shop.medical.philips.com

Online Ordering

Online ordering is a simple process:

1 Log in using a secure password.
2 Enter the product number and quantity in the shopping cart.
3 Enter your PO or credit card number at check-out.
4 Your order is immediately transferred into our fulfillment system, where you can track it anytime.

If you are new to the web, we can guide you through the process on the phone in minutes. Many new users tell us that the ordering process is so intuitive that they do not need help, even the first time.

You can search for supplies in the online catalog three easy ways: by application category, Philips instrument, or keyword.

If you currently transmit via MMS/EDI or auto fax, the interactive system provides real-time information and services not available through one-way transmissions.

Online ordering is available to U.S. customers at the following url: http://shop.medical.philips.com.

Warranty Information

Philips Medical Supplies Guarantee

Philips Medical is committed to your satisfaction. That's why we guarantee our supplies products against defects in materials and workmanship for a minimum of one year or the balance of the product's shelf life.*

If any of our products proves unsatisfactory during the guarantee period, just let us know. We'll either refund the purchase price or replace the defective product.

We'll ask you to tell us what went wrong, so we can fix the problem and ensure your satisfaction.

* Some products have guarantees longer than one year. For further information and a complete statement of warranty terms and conditions, contact your local Philips Medical Supplies representative.

Place of Performance

Products must be returned to a service facility designated by Philips. Contact your local Philips Sales Office for information on where to return products. The customer shall prepay shipping charges (and shall pay all duty and taxes) for products returned to Philips for warranty service. Except for products returned to the customer from another country, Philips shall pay for return of products to the customer.

Limitation of Warranty

The foregoing warranty shall not apply to defects resulting from any of the following:

- Improper or inadequate maintenance by the customer
- Customer-supplied software or interfacing hardware
- Unauthorized modification or misuse
- Operation outside of the environmental specifications for the product
- Improper site preparation and maintenance

The warranty set forth herein is exclusive and no other warranty, whether written or oral, is expressed or implied.

Philips specifically disclaims the implied warranties of merchant ability and fitness for a particular purpose.

Limitation of Remedies and Liability

The remedies provided herein are the customer's sole and exclusive remedies. In no event shall Philips be liable for direct, indirect, special incidental, or consequential damages (including loss of profits) whether based on contract, tort, or any other legal theory.

The foregoing limitation of liability shall not apply in the event that any Philips product sold hereunder is determined by a court of competent jurisdiction to be defective and to have directly caused bodily injury, death, or property damage, provided that in no event shall Philips liability for property damage exceed the greater of $50,000 (U.S.) or the purchase price of the specific product that caused such damage.

NIBP Cuff Adapters

NIBP Cuff Adapters

Philips offers a comprehensive system of adapters that allows you to develop a universal solution to connect Philips NIBP cuffs to other manufacturers' NIBP monitors. Find the brand and model of your NIBP monitoring systems to see which Philips cuffs and adapters are a perfect fit for your needs. Adapters are semi-permanently fastened to the monitor air hose-end, eliminating loss or confusion.

Using this brand of single-hose monitor	The monitor hose end looks like this	Select this adapter	To connect to these Philips NIBP Cuffs (excluding neonatal sizes)
Most models with threaded female style connector: • Welch-Allyn		**M4550A** 1-hose adapter **M4551A** 2-hose Y adapter 	All 1-hose Philips reusable & disposable cuff models, excluding 40401x series 2-hose reusable cuff models (M456xA/B series) and soft single-patient disposable models (M458xA/B series only)
Most models with female quick-connect style connector.		**M4560A** 1-hose adapter **M4561A** 2-hose Y adapter 	All 1-hose Philips reusable & disposable cuff models, excluding 40401x series 2-hose reusable cuff models (M456xA/B series) and soft single-patient disposable models (M458xA/B series only)

How they are connected:

1. Attach the silver connector of the adapter to the NIBP Cuff and the white connector to the monitoring hose end.
2. For 1-hose cuff adapter applications, the silver connector is a female bayonet style.
3. For 2-hose and Y adapter applications, the silver connectors are thread-type connectors.
4. The adapters are fastened to the monitoring hose with a plastic tie-wrap to prevent loss.
